

Super Shield™ HRP Conjugate Stabilizer

Bovine and Mammalian Protein Free Stabilizer (HRPZR™-One Component)

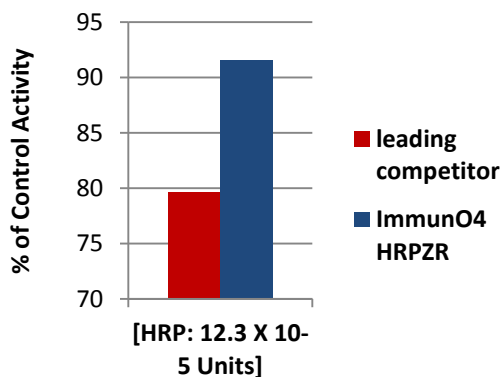

Protein Free Stabilizer and Diluent; Preserves and stabilizes the activity of HRP conjugates used in immunoassays and molecular assays.

Benefits of Super Shield™ HRP

This stabilizer was developed to maximize the life of your HRP conjugates while eliminating non-specific protein interactions.

- No Mammalian proteins
- Minimizes background interactions and issues
- Eliminates BSE regulatory concerns
- ImmunO₄ HRPZR™ synergizes with ImmunO₄ APNMC™ Coat Block reagent to further improve unwanted non specific binding
- Room temperature stable reagent
- Stable through freeze cycles
- Superior HRP and protein stabilizer / diluent

Accelerated Stability of HRP incubated in Super Shield vs Competitor Stabilizer - Two Weeks at 50° C

ImmunO₄ Partnering

ImmunO₄ scientists have developed some of the best commercial research formulations in the market. This team of scientists have reassembled to make the next generation of reagents. ImmunO₄ technical team can custom develop products for your needs. Our team has the capability to make it work for you. "With ImmunO₄, it was easy to get formulations that worked in my assays."

- Match or exceed competitor performance for easy transition from existing reagents
- Flexible business to business interaction
- Custom formulation that meets YOUR assay needs
- Reliable and consistent manufacturing

Applications

HRPZR™ is specially formulated for stabilize the activity of HRP conjugates. HRPZR™ also preserves proteins in various other assay systems. It is often used in ELISA, Western Blot, Southern/Northern Blots, and lateral flow. Super Shield can be used directly as an assay buffer. The product is supplied as a 1X, one component liquid, ready to use formula. Antimicrobial agents are included to retard bacterial growth.

Packaging

HRPZR is available in 100 mL, 200 mL and 1L volumes. All materials are sold in custom or bulk quantities. Custom filling available.
